Project Experience

Taiwan International Documentary Festival

Official Website

In 2014, i worked as a summer intern at Netivism (<http://www.netivism.com.tw>) and this was one of projects I had joined. I took part as a front-end developer and also assisted in back-end engineering. The website is a responsive web design that developed with Drupal.

Citizen of the Earth, Taiwan Official Website

This is a project that I worked as a remote worker with Netivism. In this project, I transferred the data from previous site to new site and built new one with Drupal. Cooperated with UI designer to build the responsive metro style UI.
